- 3. Council commented about the low pressure incident that occurred in the past and how effective it was to have the guidelines and policies in place when low pressure has been detected. They were pleased that SWM could increase the pressure to satisfy the hospital's needs.
- 4. Council agreed that due to the review of the incident it would be a good idea to purchase a pressure meter and that possibly the best location would be at the sewer plant so that staff could read the pressure daily.
- 5. Council thought the suggestion by Richard to provide the mun. office with chorine and THM data that is recorded weekly by Sco-Terra staff would keep Council updated on the system's operational performance.
- 6. Council is waiting to review the flushing report. Richard is waiting for his boss to release the report.
